Something that is a value to me

Specific Purpose: To inform my audience that my job is a value to me.

Central Idea: My job teaches me how to be a leader, patience, and solve-problems.

Introduction

I. We all love to make money but if we don't have a job we won't have money coming in our banks. However, my job doesn't only have value to money but it teaches me some valuable life skills that I need in my life.

A. It teaches me how to be a leader and work well with different people.

B. learn how to patience with guest and co-workers.

C. It also makes me learn how to solve-multiply problems at the same time.

II. Today I will talk how my job is a valuable to my future life skills and why I am glad to have this job to teach me these important skills.

(Transition-Let start with leader)

Body

I. Ever since I started working at Regal Showplace 16. I have been a leader and work well with other co-workers when cleaning theaters.

A. The day I am working. I lead the usher groups also know as URL. This means "Usher, Restroom, and Lobby."

1. I make sure the theater is clean and safe for guest and I do theater checks every 20 minutes to make sure everything is working.

2. I also make sure the restroom is clean for guest every hour.

3. I always make sure the Lobby and hallways are free of spills and popcorn frequently throughout my shift.

(Transition-Next is patience)

II. Since I started working at Regal Showplace 16 my patience have improve significantly. My patience improved significantly because dealing with guests, co-workers, and cleaning a dirty theater requires a lot of patience.

A. Having patience is important at Regal Showplace because guest may take a while to leave a theater that I am waiting to clean, co-workers may take longer to clean or work with, and a theater may take forever to clean.

1. When the movie ends. The guest loves to watch the dumb credits and make sure they see the names of the characters. "I understand if it is a marvel movie because there is always something at the end."

2. Co-workers may be a lot slower and hard to train them if I have to work with them.

3. A sold out theater may take up to 20 or more minutes to clean and it may take all of your patience away.

(Transition-Finally solve multiply problems at the same time)

III. This is probably multitasking but for me I call it solve multiply problems at the same time because a lot of problems happen at the same time and you have to figure out what problem should be done first.

A. Problems always happen at Regal Showplace I mean trillions happen during my shift and it funny to me because I run around like a headless chicken to fix them all in less than 5 minutes so I don't become behind on URL task.

1. If a restroom overflowed and flooded I have to somehow go and fix that first since someone can get hurt.

2. While doing a restroom that flooded there is a soda spill in the lobby and I have to do that right away and stop doing the flooded restroom.

3. This is the worst case that can happen when I have to clean a flooded restroom and a soda spill is when some get sick and pukes. I have to find a way to clean that crap up all at once. It happened before. It's also worst when theaters are getting out and I get behind on theaters.

Conclusion

As I said these are the most important life skills to have in my life in my opinion. I love to be a leader of my job and it requires a lot of patience with co-workers and guest and many other things but solving-multiply-problems at the same time are extremely difficult and somehow I enjoy during. My job isn't only having value of making money but it also learn some important life skills for my future life.
