

Artifact: Discussion Board

Course: Spanish-252

Goal: Professionalism

When displaying professionalism, I displayed professionalism through my first discussion in my Spanish-252. The point of this first Spanish discussion was to share with the other classmates, a little about our family such as their personalities. As I typed up my response to the discussion question about my family, I didn't necessarily speak, but rather typed my response in a respectful and honest manner. My response allowed me to present myself in a professional and educational online environment on the discussion displayed on Canvas. Apart from submitting my response, I was able to engage by replying to my other classmates' submissions describing their families. When replying to my fellow classmates, I kept in mind to be aware of responding in a professional manner.

ΦΘK Tips

Strengths:

- The writer described how they communicated effectively within the group and tried to display courtesy towards others in the context of the discussion

Opportunities:

- It is hard to directly see whether the student's communication was respectful to their classmates, since most of the committee would not be able to read in this language. The student could add more detail about the interaction.

Additional Tip:

- Artifacts are not required for the professionalism section of the portfolio
